

Dirac Processor: Move filters between devices

Dirac Processor stores its filters in the folder:

- Windows
 - C:\Users\\AppData\Roaming\Dirac\Dirac_Live_Processor\filters
- macOS
 - Macintosh HD/Users/<username>/Music/Audio Music Apps/Dirac/filters

You can copy the filter from your first computer by copying **filter.bin** to the same location on your second computer.

You might need to create the folder in the second computer manually.

For example a 5.1 filter stored in the first filter slot would be located here:

- Windows
 - C:\Users\\AppData\Roaming\Dirac\Dirac_Live_Processor\filters\multi\6_channels\0
 - Macintosh HD/Users/<username>/Music/Audio Music Apps/Dirac/filters/6/0
